

IMPORTANT NOTE

The Moroccan Staff Team decided today a new Facility Rating Assignment for the following positions:

- GMMM_CTR
- GMMM_N_CTR
- GMMM_OC_CTR
- GMMM_S_CTR
- GMMM_E_CTR

These positions are now downgraded from ADC to AS3 Controllers. However, the team is aware that the AS3 controllers do not have all the skills required to properly control the entire airspace over Morocco. This is why this modification is accompanied by a new procedure which is as follows.

NEW REGULATIONS

CCR.1: The applicant must be a member of the Moroccan Division.

CCR.2: The applicant must ask and succeed to a training with the division DIR/ADIR, approving his appointment as an "Approved ATC".

CCR.3: The applicant must be irreproachable during each control session, otherwise his qualification may be withdrawn.

CCR.4: In case of connection of a member not approved by our services, he will be asked to disconnect.

In case of disrespect of these only rules, the Center and relative positions will be upgraded again to ADC rating.

We count on you and your cooperation in order to avoid any overflow, and therefore, to penalize other members, but it is with pleasure that our Staff will receive the validation applications.

To send your Approval Status request, send an email to ma-hq@ivao.aero with your availability.
